HyperDrive

www.hypertec.co.uk

Product Overview

The HyperDrive is a USB flash memory drive designed to take the hassle out of data access and transfer.

A plug and play device that simply plugs into any USB port – PC, laptop, projector - if it has a USB port the machine will automatically detect the HyperDrive as a removable drive.

Now you can read, write, copy, delete and move data from your hard disk to the HyperDrive or from the HyperDrive to your hard disk.
